EXAMINER

CHERRY, EUNCHA P

ART UNIT PAPER NUMBER

2872

DATE MAILED: 09/25/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/722,452

Applicant(s)

ICHIKAWA, JUNICHI

Examiner

EUNCHA P. CHERRY

Art Unit

2872

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-10 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 4.
- 4) ☐ Interview Summary (PTO-413) Paper No(s) ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

Art Unit: 2872

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Koide.

Regarding claim 1, Koide discloses a light scanning method comprising the steps of:

(a) making plural light beams emitted from a light source (Fig. 2A, 21a and 21b) incident at least onto reflection surfaces of a deflector (27) in a mutually parallel state in a direction orthogonal to a main scanning direction (column 4, lines 16-17 and see Figs. 2B(1), 2B(2), 3);

(b) deflecting the plural light beams by said deflector (column 4, lines 17-20); and

(c) focusing the plural light beams deflected by said deflector on a surface to be scanned (46a, 46b), with an afocal relation between the reflection surfaces of the deflector and

Art Unit: 2872

the surface to be scanned in the direction orthogonal to the main scanning direction (column 4, lines 8-13).

Regarding claims 2 and 5-10, Koide discloses a light scanning device which deflects plural light beams emitted from a light source by making the light beams incident on reflection surfaces of a deflector, and scans the surface to be scanned simultaneously by the plural light beams deflected by the deflector, the device comprising:

(a) a first optical system for making the plural light beams incident at least onto the reflection surfaces of the deflector in a mutually parallel state in a direction orthogonal to a main scanning direction (Fig. 2A, pre-scanning elements 22a, 22b, 23a, 23b, 24a, 24b, 25); and

(b) a second optical system for focusing the plural light beams, which were deflected by the deflector, onto a surface to be scanned, with an afocal relation between the reflection surfaces of the deflector and the surface to be scanned in the direction orthogonal to the main scanning direction (column 4, line 35 through column 5, line 3).

The second optical system focuses the plural light beams deflected by said deflector on the surface to be scanned, while setting a conjugate relation between the reflection surfaces of

Art Unit: 2872

the deflector and the surface to be scanned (column 4, line 56 through column 5, line 4).

The second optical system comprises an $f\theta$ optical system having power for condensing only in the main scanning direction, a first cylinder optical system having power for condensing in the direction orthogonal to the main scanning direction, and a second cylinder optical system having power for condensing in the direction orthogonal to the main scanning direction (see Fig. 2A) main scanning direction. The light source is a vertical cavity surface emitting laser diode array having plural light emission points disposed in a two-dimensional arrangement (column 3, lines 58-63). The deflector is a rotary polygonal mirror rotating at a predetermined speed (column 4, lines 4-6).

Regarding claims 3 and 4, Fig. 6A discloses a light source emits the plural light beams in a mutually parallel state, and said first optical system sets an afocal and conjugate relation between said light source and the reflection surfaces of said deflector (see Fig. 6A). The first optical system comprises a collimator lens (3a, 3b, 3c, 3d) for making the light beams emitted from the light source as divergent luminous flux into a substantially parallel luminous flux, and a cylinder lens (4a, 4b, 4c, 4d) having power for condensing into the direction

Art Unit: 2872

orthogonal to the main scanning direction, and focusing the light beams made into substantially parallel luminous flux by the collimator lens as a line which is long in the main scanning direction on the reflection surfaces of the deflector, the collimator lens and cylinder lens are disposed such that a focal position at a light beam advancing direction downstream side of the collimator lens substantially coincides with a focal position at a light beam advancing direction upstream side of the cylinder lens (see Fig. 6A).

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to EUNCHA P. CHERRY whose telephone number is 703-305-0997. The examiner can normally be reached on M-F 6:30-4:00, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, CASSANDRA SPYROU can be reached on 703-308-1687. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7724 for After Final communications.

Application/Control Number: 09/722,452
